7th April 2010

Dear Sir / Madam

SAGA Handicap Service to Golf Clubs

I am pleased to inform you that the South African Golf Association ('**SAGA**') and Women's Golf South Africa ('**WGSA**') have signed the final contract with National Golf Network (Pty) Ltd ('**NGN**') to purchase their handicap business, including all current handicap contracts and terminal hardware.

In addition the SAGA and WGSA have entered into a joint venture agreement with Super- Brands Pty Ltd, a company involved in the development, marketing and distribution of sporting brands in South Africa. The JV company will run the business of providing official handicaps and handicap cards to Southern African golfers and also run the associated internet site. The handicap system will be installed and run on behalf of the JV by a local subsidiary of Albatros Datenservice GmbH, the company SAGA awarded the SAGA Handicap Server tender to last year.

The hand over and implementation process, from the NGN System to the new system will take a few months to complete, and is currently planned for the end of May 2010. The joint venture company will do everything possible to ensure that this process is as painless as possible for both clubs and golfers. In addition the joint venture company will communicate with you and your members on an ongoing basis to ensure that you are kept fully informed during the process.

I would urge all affiliated golf clubs with current handicap contracts with NGN, to continue to comply with the terms of these contracts. The joint venture company will in turn honour all aspects of these contracts, regardless of when payment was made.

I would like to take this opportunity to thank you for your patience and understanding and to also thank NGN for their positive attitude in assisting us through this process.

The SAGA and its joint venture company are committed to providing all golfers in Southern Africa with a world class handicap system that is user friendly, up to date and accurate.

Kindest Regards

Enver Hassen
SAGA President
